GENERAL ARRANGEMENT

## SUMMARY

The futuristic project 48' ICEBERG designed and built with procedures, technologies and materials used in the offshore experience by Ferretti. The motorization includes 3 Seatek engines of 600 horsepower each, which allow to reach a speed of 60 knots. She is also expressed in the driving dashboard: made of carbon, it allows the pilot to control every maneuver by means of a computer that fully manages systems and navigation phases.

The nervous system is a revolutionary intelligent electrical system and computerized control system for the progress and management of the ICEBERG. Microcomputer, simplified wiring, disappearance of fuses are some of the advantages that give total reliability to the system, eliminating the problems and saving weight provided by the reduction of 70% of the cables.

## KEY FEATURES

- Deep V hull with 2 steps
- Carbon kevlar construction
- Trimax surface drives with Rolla propellers
- Timeless design
- Enclosed tender garage
- Manuel carbon hard top
